

Pálmi V. Jónsson, MD, FACP

Pálmi is Chief of Geriatrics at Landspítali University Hospital, Reykjavik, Iceland and Professor of Geriatrics at the Faculty of Medicine, University of Iceland. A graduate from the Harvard Fellowship in Geriatric Medicine he has lived and worked in his native country, Iceland, from 1989. During early years he studied cardiovascular function and falls and introduced a framework for decision making at end of life to Iceland and worked on nursing home pre-admission assessment.

Pálmi is on the executive committee of the AGES study¹, a large epidemiological study on aging, a collaborative project between the Icelandic Heart Association and National Institute of Aging. Pálmi also sits on the Board of InterRAI² as a secretary and has introduced the Minimum Data Set (MDS) InterRAI tools to Iceland. Recently, Pálmi joined the Board of the Middle Eastern Academy for Medicine on Aging. Pálmi has published various research papers and book chapters on geriatric and gerontological issues.
